Rejilla Flex | Flex Grid | Grille Flex

Su estructura en forma de trapecio evita el puente de agua incluso cuando está mal colocada. Facilita la reposición de piezas sueltas. Permite realizar curvas a partir de un radio de 75 cm.

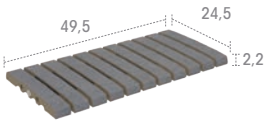

Trapezoidal structure allows for perfect water flow even when poorly laid. Loose pieces can be easily repositioned. It can be used to create curves with a radius of more than 75 cm..

Sa structure trapézoïdale permet une parfaite évacuation de l'eau. La mise en place de pièces de remplacement est simplifiée. Permet de réaliser des courbes à partir d'un rayon de 75 cm.

Rejilla Compact | Compact Grid | Grille Compact

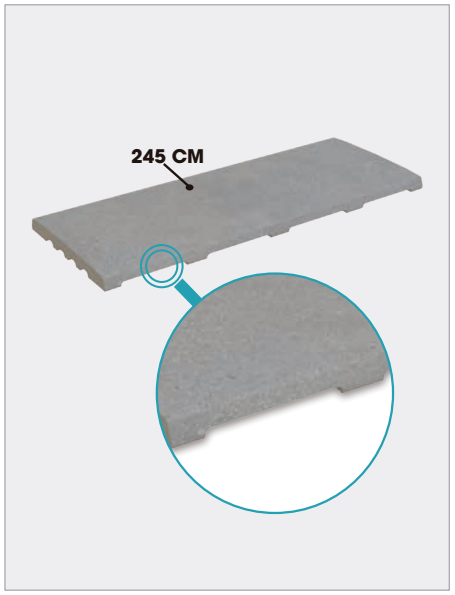

Consiste en una sola pieza fabricada sin adhesivos. Al colocarla queda totalmente integrada con el borde. El desagüe se realiza a través de un sistema de orificios laterales apenas visible y con una capacidad óptima.

Composed of a single piece, without adhesives. Once in place, it blends in perfectly with the edge of the pool. The water is drained through side openings that are barely visible and have optimal capacity.

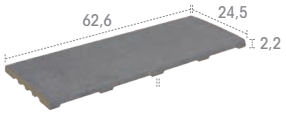

Elle consiste en une seule pièce, conçue sans adhésifs. Sa mise en place l'intègre totalement au débordement. Le drainage s'effectue à travers les mini canaux latéraux, à peine visibles mais d'une capacité optimale.

En estas dos referencias, **010** y **020**, uno de los extremos acaba en un ángulo recto de 90° mientras que el otro acaba en una curva con un radio de 4 cm.

These two references, **010** and **020**, have a curve with a 4-cm radius on one end and a 90° angle on the other end.

Ces deux références, **010** et **020**, se terminent à l'une des extrémités par un angle droit de 90 °, et à l'autre extrémité par une courbure d'un rayon de 4 cm.
